# Pair-Share Activity – What is Learner Autonomy?

What is Learner Autonomy?

The image shows a mobile interface for a Mentimeter poll. At the top, the Mentimeter logo is visible. Below it, a QR code is displayed for scanning. Under the QR code, the text reads "menti.com" and "4181 8127". A status bar below the QR code says "Waiting for participants". The main content area is titled "Menti" and "Learner Autonomy". Below this, it says "Choose a slide to present". There are two poll questions visible:

- Question 1: "What is the average age of your students?" Below the question is a horizontal bar chart with three segments labeled "Average Age (10-15)", "Average Age (16-20)", and "Average Age (20-30)".
- Question 2: "What is the nationality breakdown of your students? List the top 5"

## What does Learner Autonomy mean?

Learner autonomy refers to the capacity of adult learners to take charge of, take responsibility for, and control their own learning journeys. Rather than being passive recipients of instruction, autonomous learners are active participants who set their own goals, choose their own learning strategies, and self-evaluate their progress.

# Core Characteristics

- 1- Active Ownership
- 2- Goal-oriented
- 3- Metacognitive Awareness
- 4- Self-reflection
- 5-Resourcefulness

# Why Learner Autonomy Matters?

- 1- An autonomous learner is a lifelong learner
- 2- Autonomous learners tend to be more engaged, empowered, independent, and responsible.
- 3- This approach humanizes learners by showing sensitivity to their individual needs and preferences
- 4- This approach acknowledges that learning is not equivalent to “being taught”.

# How can schools facilitate learner autonomy?

**1- Curriculum,** : interest-based content, learning strategies, enabling self-assessment, Can-Do statements

**2- Creating choices:** shifting away from cookie-cutter teacher-led courses to variety of content to accommodate different needs and interests.

**3- Knowing their students.** Placing students' needs at the center, fostering self-awareness and metacognition

## How can schools facilitate learner autonomy?

**4- Instructor training:** scaffolding independence, provide choices, project-based learning, guide goal-setting and encouraging reflective learning

**5- Teaching Learning Strategies:** vocabulary learning methods, listening (gist vs detail) & reading strategies (Skimming, scanning), using authentic materials

**6- Resources:** Provide access to self-study materials, online resources, and libraries.

# What we do at ILSC to encourage Learner Autonomy

# Pre-Arrival

- Online Language Assessment
- Capturing Student Goals with our online assessment
- Pre-Arrival Course Selection
- Access to the ILSC App

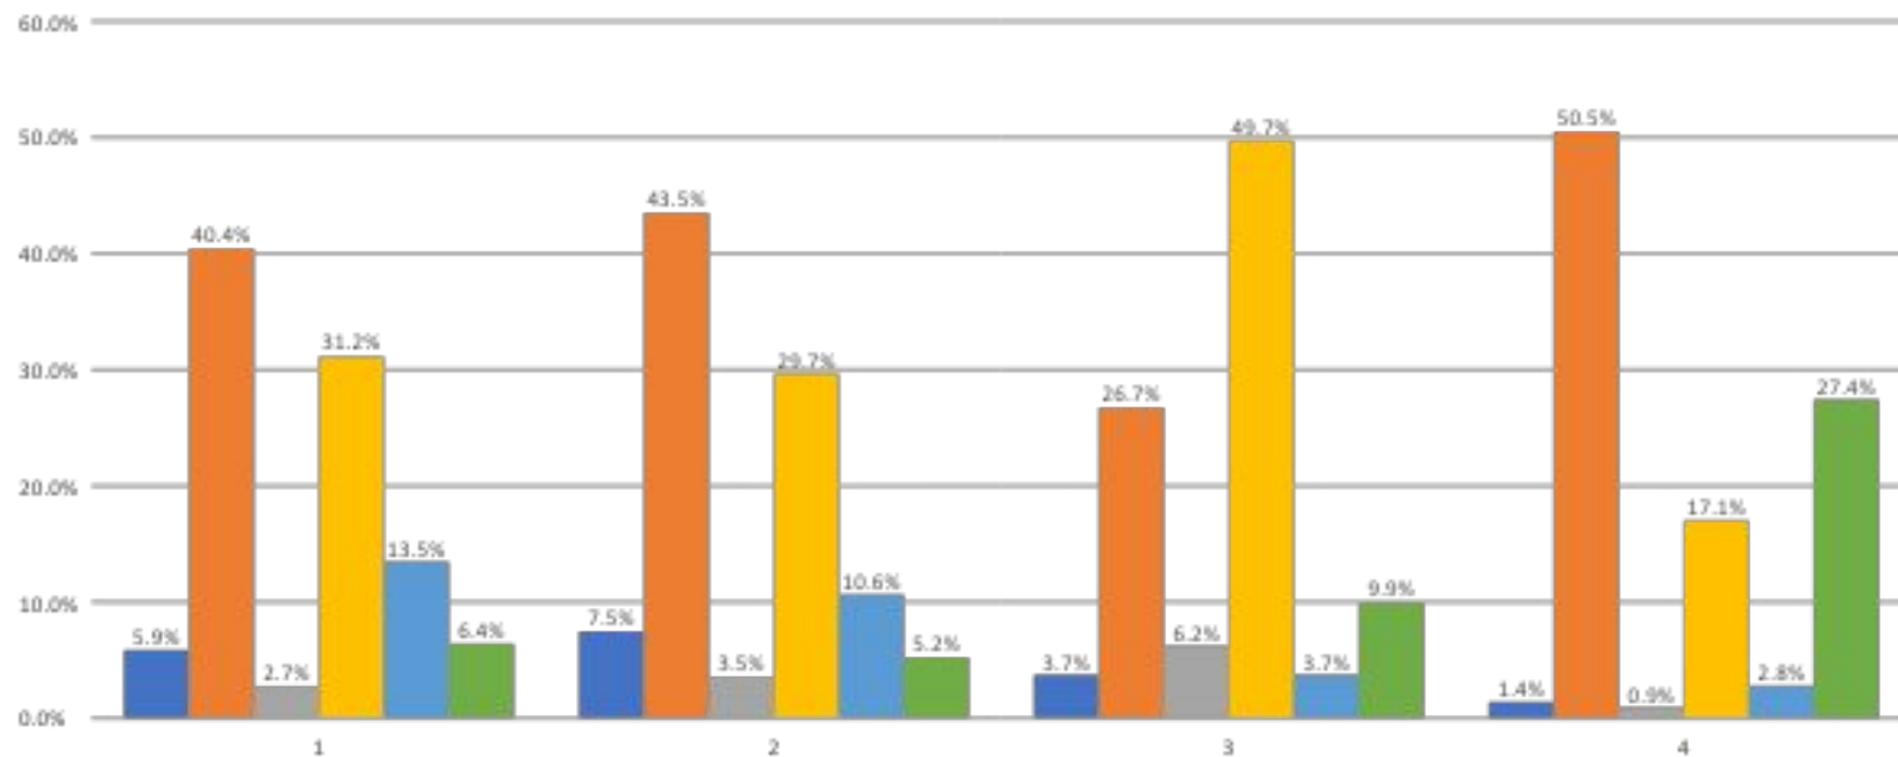

# Pre-Arrival

- Pre-Arrival Assessment – Goal Question

## Questions asked:

1. Why do you want to study at ILSC?
2. My primary goal is: (students have a drop-down menu of various goals to choose from i.e. To study at a college or university)

Distribution of Study Goals across Canadian schools (%)

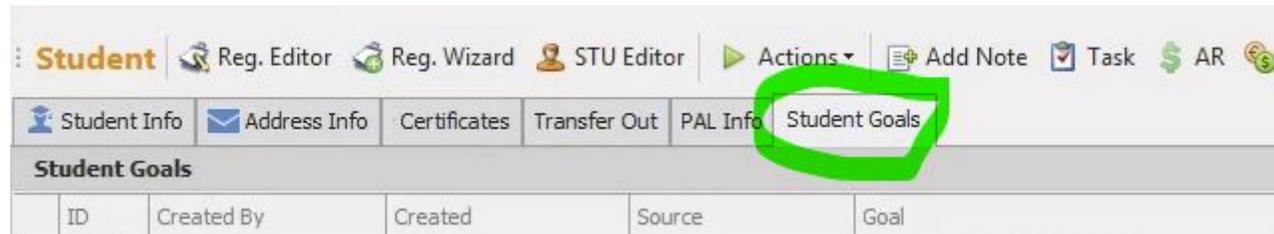

■ To make int friends 
 ■ To study at a college or university 
 ■ To understand movies, TV shows 
 ■ To Use my language Skills at work 
 ■ To Use my language Skills when traveling 
 ■ Others

# At ILSC

- Access to the ILSC App
- Creating awareness of goals. These are transferred to our Student Management System (SMS) & goals are transferred to the Progression Report.
- First week Survey to students
- Offering PDs to Instructors

# At ILSC

Goals in our SMS:

The screenshot shows a software interface with a top navigation bar. The 'Student' menu is open, and the 'Student Goals' option is highlighted with a green circle. Below the navigation bar, there is a table with the following columns: ID, Created By, Created, Source, and Goal.

ID	Created By	Created	Source	Goal
----	------------	---------	--------	------

# At ILSC

- Offering content for self-directed learning
- Evaluation & feedback throughout the course & at the end (Progress reports)
- Having/creating diverse set of options for studies in additional sessions

# Activity: From Teacher-Led to Learner-Led

Task (small group):

1. Common ESL Activity
2. Identify where the teacher controls the learning
3. How can we redesign to make it more learner led?

# Activity: From Teacher-Led to Learner-Led

## Activity: From Teacher-Led to Learner-Led

**Level:** CLB 4–5 (Low-Intermediate)

**Skill Focus:** Speaking – Making Appointments by Phone

**Time:** 30–40 minutes

## Part 1: The Traditional (Teacher-Led) Version

### Objective

Students will practice making a doctor's appointment by phone.

### Procedure

- Teacher presents model dialogue on board.
- Teacher explains vocabulary.
- Students repeat sentences.
- Students practice the exact dialogue in pairs.
- Teacher corrects errors.

# Activity: From Teacher-Led to Learner-Led

## Where the Teacher Controls Learning

- Chooses topic
- Provides script
- Controls language
- Leads correction
- No strategy instruction
- No reflection

# Activity: From Teacher-Led to Learner-Led

## Choice

Instead of only “doctor’s appointment,” learners choose:

- Doctor
- Dentist
- Hair salon
- Child’s school
- Job interview

They can also choose:

- Phone call role-play
- Voice message
- In-person conversation

✓ Learners select a scenario relevant to their life.

# Activity: From Teacher-Led to Learner-Led

## Strategy Instruction

Teacher models and names strategies:

- Write key phrases, not full sentences
- Use a question checklist
- Practice asking for repetition
- Listen for key information (date, time, name)

Teacher says explicitly:

- “You can use this strategy when you call outside of class.”

Students create a small cue card using these strategies.

# Activity: From Teacher-Led to Learner-Led

## Practice

Pairs role-play using their own scenario and cue cards.

Teacher:

- Observes
- Takes notes
- Delays correction

Encourage self-correction first:

- “Did that sound clear?”  
“What strategy did you use?”

# Activity: From Teacher-Led to Learner-Led

## Reflection (5 minutes)

Students answer:

1. What was difficult?
2. What strategy helped you most?
3. How confident do you feel (1–5)?
4. Would you feel ready to do this in real life?

Optional:

Students set a real-world goal:

“This week, I will call to...”

# Activity: From Teacher-Led to Learner-Led

## What Changed?

### Teacher-Led

One script

Full sentences given

Immediate correction

No strategy focus

No reflection

### Learner-Led

Multiple choices

Students build own language

Guided self-monitoring

Explicit strategy teaching

Structured reflection
